5 MAY 2026

Monthly Newsletter

Here's what has happened so far, and what's to come!

A warm welcome to our newsletter!

As AnithUncommon continues to grow and expand, we are thrilled to introduce our series of monthly newsletters.
In this handcrafted issue, you will find everything a student needs. Whether it is advice on navigating high school, study schedules that actually work, or a midnight snack idea that tastes like heaven.

Furthermore, you will get to read about our progress, who we are and how to apply as a student, mentor or volunteer! (if you're in, there's a whole group of exahusted teenagers from across the globe waiting for you)

Here, at AnithUncommon, we've gone way past the stage of being a student-led organisation and entered into the uncharted territory of becoming an unlikely family united by school, internships and learning.

Also in this issue is a section I personally love, where you get to meet a member of our core team, read about their journey and get to know more about them.

So settle in, set the vibes, and enjoy reading!

In this newsletter you can expect:

Who We Are

AnithUncommon is a non-profit organisation for students, by students. Based in Indonesia, we aim to bridge educational gaps by providing access to “uncommon subjects.”

Developing regions in many South Asian countries prefer that students pursue STEM subjects, in hopes of a brighter future with guaranteed pay and a defined career path. But what of those who dare to step away from the typical and walk the path less trodden?

We believe that every student should get the support they need to pursue what is less certain.

Here, we aim to foster a reliable digital learning environment that seeks to challenge traditional classroom norms by encouraging passionate students to learn subjects with limited outreach and little to no support beyond school. We envision a future where no subject is considered beneath the other, and students choose their classes out of passion and not compulsion.

This is AnithUncommon

30+ students working together, carefully selected from highly competitive candidate pools, who have found their niche.

1 year since we began our journey, and growing everyday while expanding our horizons.

Members from over 20 countries across the globe bringing diversity and cultural awareness while being held together by the same goal.

AnithUncommon

Holiday Study Vibes that WORKS.

As a high school student myself, I have tried multiple study techniques and schedules through the course of my schooling. From parents, teachers, Instagram, LinkedIn, Google, you name it, I probably have a scrap of paper in my desk with it.

However, when they don't work for us, it's extremely frustrating. The truth is, these schedules are usually suggestions. They might work for someone with a certain school timing, sleep pattern, and energy level, but may not work for you, and it's completely okay!

One method that I found to be quite useful is time blocking. It is a productivity technique where you split your day into "blocks". This allows you to have a structured day, with minimal burnout and consistent breaks.

My weekend/holiday study schedule

8:00 ➡ Wake up and get started with my day.

9:30 - 11:30 ➡ Study Block 1 (Subject A)

11:30 - 12:30 ➡ Break 1

12:30 - 14:30 ➡ Study Block 2 (Subject B)

14:30 - 15:30 ➡ Break 2

15:30 - 17:30 ➡ Study Block 3 (Subject C)

17:30 - 18:30 ➡ Break 3

18:30 - 20:30 ➡ Study Block 4 (Subject D)

As you can see, this schedule allows me to sleep in, have fun, and still manage to get 8 hours of study time.

Now, if you have extracurriculars, tuitions, or other commitments during the week, this schedule will definitely NOT work.

Another thing to keep in mind is your school timings. Some schools end in the afternoon, while others start early and go on till the evening.

If you live in a crowded city, or a little far from your school, commute time is also a factor when assessing how much time you can dedicate to academics.

AnithUncommon

Study Vibes that WORKS.

One of the best things about time blocking is flexibility. If you have a class, prefer to sleep later, or wake up at a different time, it is easy to switch plans and substitute missed blocks.

Here's a sample full-day schedule, keeping in mind the aforementioned factors:

My full school day study schedule

5:00 ➡ Wake up, exercise, get ready, finish homework or any other tasks that can be done.

7:30 - 15:30 ➡ School timings, including commute.

15:30 - 16:30 ➡ Check phone, eat, and chill.

16:30 - 17:30 ➡ Study Block 1

17:30 - 17:45 ➡ Break 1

17:45 - 18:45 ➡ Study Block 2

18:45 - 19:00 ➡ Break 2

19:00 - 20:00 ➡ Study Block 3

20:00 - 20:15 ➡ Break 3

20:15 - 21:00 ➡ Study Block 4 (preferably a lighter subject)

21:00 onwards ➡ Lights down, get ready for bed, prepare for tomorrow.

The above schedule has provisions for a mental reset after school, good sleep, a fresh start in the morning, and 3 hours and 45 minutes of study time.

Always remember to play around with a schedule and see how it works in your day before deciding whether or not to implement it. It is also essential to get a good night's sleep and ensure you take plenty of breaks to avoid burnout, frustration, or health issues. Some academic years are rigorous, tough, and of the highest importance, where you simply cannot afford to get sick.

Before all else, prioritise yourself and both your mental and physical health alongside your goals.

Our Core Team

Edith Hoeijaya

Edith is a 17-year-old high school student from Makassar.

She co-founded AnithUncommon with her friend Angelina in May 2025 to help bridge the educational gap in her area, where humanities students often lacked support.

Today, she oversees the organisation's executive responsibilities as it continues to grow.

Angelina Caumen

Angelina is a 16-year-old high school student from Makassar.

She co-founded AnithUncommon with Edith after noticing the lack of support for students interested in humanities subjects at her school, therefore creating a platform built by students, for students.

Today, she coordinates mentors and classes

Rey Hamfry

Rey is a 16-year-old high school student from Makassar.

He joined AnithUncommon with the purpose of helping other students chase after their dream even if their school doesn't

Today, he help manage AnithUncommon's overall day to day operation

Nadine Leanna

Nadine is a 17-year-old high school student from Bali.

She joined AnithUncommon after seeing how a lot of students are studying subjects they aren't passionate about & wanted to change that.

Today, she help coordinate volunteers in AnithUncommon

Fun Fact...

- The name AnithUncommon originates from its co-founder's name, Angelina and Edith
- Our team consist of members from over 10 countries!

Mentor Spotlight - May

Yassmin Younes

Yassmin is an IGCSE Biology mentor from Egypt, known for her exceptional understanding of the subject.

She joined AnithUncommon to give a helping hand and help more students achieve 'A' grades. Her teaching journey started from tutoring friends and sharing notes with them.

Lakshya Shree

Lakshya is a History, English Lit, and Geography mentor from India who has loved teaching even as a child.

With a vision to learn deeply and make studying easy, she brings warmth and connection with every lesson, making her an obvious choice for this month's spotlight.

Akshiti Bharadwaj

A Political Theory mentor from India, Akshiti is a passionate youth advocate. She strongly believes that informed youth are better inculcated into decision-making spaces and strives to reduce political ignorance among students. Her dedication to her subject lives in her eloquent teaching style and intense discussions.

Vihaan Amin

A part of our STEM department, Vihaan is a Mathematics mentor from the US.

He is passionate about our effort to increase access to various subjects and strongly believes in learning from his mentees. He also enjoys meeting new people and learning about different cultures.

Want to be a mentor?

Apply HERE!

What to expect:

- One-on-one or small group mentoring
- Flexible commitment
- Support from AnithUncommon team
- Opportunity to share knowledge and experiences

How To Join Us?

1. Go to our Instagram or LinkedIn page to find our linktree, or use this link.

2. Click on 'Register' in our linktree page.

3. Fill out the registration form and book an interview with us through Calendly.

4. Wait until you recieve an email confirmation from our HR Department, confirming your interview slot.

5. Join the interview on time, with all details discussed through mail beforehand.

6. If selected to proceed further, you will be with AnithUncommon for a trial period of 1 week.

7. Welcome to our organisation!
